This book addresses the theme of global sustainable development across two dimensions. First it introduces its progress and prospects in both rich and poor countries. It then outlines the major trends that will in practice influence the direction of sustainable development into the next century. It encompasses an understanding of sustainable development as both a theoretical framework for thinking about how to deal with human needs and environmental limits on the one hand, and a more material understanding of it as a set of practices, on the other. The book is written by a group of internationally-recognised experts in the field, and is distinctive in offering a variety of philosophical and ethical reflections on sustainable development. Core issues covered include economic growth, poverty reduction, future generations, technology, population and diversity, making it an ideal text for students.
