Adult ADHD

By Zeppo

If I may, I would like to qualify my review by saying this is simply from my own personal experience, and it is by no means, a definitive elaboration on learning. I grew up with ADHD before a lot was known about it. High school was really tough for me, but at the same time, I knew I was not stupid. After graduating in 1979, I floundered for many years. At 26, I finally got accepted at a Big 10 university. This series of books was the first of its kind that I had ever read, and it literally got me through undergraduate college. It was not until I got to my first graduate program that I was diagnosed and treated, so the whole series by Mr. Fry was of inestimable value to me. I always fall back on the basic elements I picked up from reading his work. As far as writing goes, I was able to get into an honors writing section as an undergrad and I finished my first masters thesis in 4 months, with Ron Fry's advice and explanations as a foundation. That was back in 1999. I am now in another grad program in which I received a full merit scholarship and I purchased the Kindle version of the book to refresh my memory. Will it work for you like that? I have no idea. But I would

recommend trying it very highly.
