This handy reference provides users with an understanding of complementary and alternative treatment options for more than 130 common disease states. A practical manual, it describes a variety of possible approaches to small animal disorders. Concentrating on nutrition, herbs, traditional Chinese medicines, and physical therapies, the authors present both tradition- and evidence-based therapies for disorders not always responsive to conventional therapies. Each monograph-style discussion of natural therapies for disorders common to specific body systems presents therapeutic rationales with the goals of treatment, alternative therapies with conventional bases, paradigmatic options, and authors' suggestions from which they've experienced success. Key references are also included at the conclusion of each chapter.

- Presents new and alternative therapies with scientific support, encouraging veterinarians explore new therapies with confidence.
- Helps veterinarians develop treatment plans - a vast improvement over large texts that simply introduce the therapies.
- Clearly explains esoteric concepts of traditional Chinese medicine in updated language.
- Practical, user-friendly pocket manual format allows for quick access in the clinical setting.
- Chapters are organized logically by body system and disorders are alphabetized within each chapter.
- Each body system chapter includes a case report that describes the history, physical examination, assessment, treatment, and outcome of a specific patient to further illustrate how to develop a treatment plan.
- Each appendix offers practical backup for designing treatment plans, from homemade diets and Chinese food therapy to oral herb doses and a valuable herb cross-reference table.

Help Your Pet at Home

By Tika Williams

Written by two holistic vets, the Manual covers different treatment options for an impressive number of illnesses and health issues. You'll find diet, supplements, Western herbs, Chinese herbs, acupuncture, and sometimes essential oils. There's even an "Author's Choice" section for each illness, so that if you're wondering which of various options to choose, both the vets list their recommendations.

The book is beautifully organized, fitting a tremendous amount of material into a small format. Chapters include muscular/skeletal disorders; dermatological disorders; infectious diseases; immunologic disorders; endocrinologic disorders, etc. The illnesses are laid out alphabetically, with easy-to-see treatment options. Sidebars describe case reports with excellent Discussion, Treatment and Outcome sections.

At first I wondered whether the book would be too technical for me. But as I read along, I was really impressed by the non-technical language, the thoroughness of the symptoms and treatments, and the book's excellent organization. Only the Chinese herbs sections are not accessible if you don't know traditional Chinese medicine, and this problem is addressed in an appendix with explanations of the uses and western names of the Chinese herbs.

Other appendices are helpful, too: "suggested oral dosages for herbs"; "suppliers" of herbs for easy ordering, and even a chart with acupuncture points. (If you know acupuncture, you can use these points without needles.) For anyone doing chemo for cancer dogs, you'll get help here in figuring out a supportive herbal and supplement protocol. A fantastic book!

Good job

By Patrick

This is a wonderful text on complementary medical therapies for pets. A superb introduction to herbal medicine and understanding Traditional Chinese Medicine. I highly recommend it and as a fellow holistic veterinarian and author (8 Weeks to a Healthy Dog, The Allergy Solution for Dogs, and the award-winning The Natural Health Bible for Dogs & Cats,) I found the information quite useful.
