This is why online e-book [Sapiens Rising: The View From 2100 By Neil Freer](#) ends up being most really wanted.

# **SAPIENS RISING: THE VIEW FROM 2100 BY NEIL FREER PDF**

A visionary work from a futuristic philosopher. Presents in great detail a positive, compelling view of the new human and new human society that goes beyond cultures, nations and civilizations; beyond democracy, socialism, communism and money; beyond competition under the illusion of limited resources; beyond the godspell Babel-factoring religions; beyond the old new age. Reveals how we will live as enlightened, generic humans having restored the true knowledge of our history as a genetically created species - part Homo erectus and part Anunnaki/Nefilim. Accepting and integrating this proven knowledge will allow us to experience planetary peace and meet the conditions for matriculation into stellar society. Sapiens Rising presents a meta-scenario, the largest picture of our current consciousness revolution and the wild card memes and technologies that afford us the ability to transcend and achieve cosmic consciousness and our place among the stars. Whatever we can conceive we can achieve. Whatever we can comprehend we can transcend. Previously released as an e-book only, the author claims it has reached Michelle and Barack Obama, M. Gorbachev, John Petersen of the Arlington Institute, the Dalai Lama, Pope Benedict, Klaus Schwab (of Davos), Presidents Clinton and Carter, Charlie Rose, and Bill Moyers, among others.

Savvy

By M Halla

We are at at time in the history of human beings when most institutions are hidden in a fog of deceit, delusion and extremely out of balance. ....whether it be religion, education, commerce or government. Answers are in order.

Guess what? A big ray of hope, sanity, knowledge and solutions is now available to give us direction and eye opening information to lead us to a place of PEACE, SANITY and BALANCE. This amazing work is " Sapiens Rising " by Neil Freer who is quite and extraordinary and savvy guy.

" Sapiens Rising " provides us a wake up call, knowledge and solutions to the important issues confronting mankind today.....that are being ignored, sabotaged and propagandizes to provide insane wealth and power to a minute few at the expense of the VAST MAJORITY. The reader will realize and obtain information and answers to historical, personal and spiritual issues as well as current events that heretofore have been unavailable and in many cases not in the thought patterns of many citizens.

WOW !!! We all get a chance to unlock and open our perspectives to let in a new energy and ideas and come

to a place of Love and Harmony where we as a species can make decisions that work for the Highest Good of All.

Hold on to your hat, open your hearts and minds and you will move to new dimensions. " Sapiens Rising " is a must read.

FIRST SITCHIN AND THEN FREER

By Dorothy K. Morris, Author

This, like his others, was inspired and inspiring. When one seeks genuine knowledge and looks for guidance, it is good to find a mind like Freer's. So many of his words were full of explanation for me.

Developing the mind of a futurist

By White Crow

Neil Freer writes for the voice of futurism. With an extensive background and understanding of the true history of the human species; he forecasts a maturity and expansion of human potential. We have enough prophets of doom; the hoarders and those who hunker down as they only see a future of competitive violence and destruction.

Changing human perspective is the only way this can or will be avoided. Sapiens Rising outlines both the historic redefinition of our species and futuristic hope for humanity to participate as members of a galactic society. Study of our species origins and alien intervention is the only way to redefine ourselves so that we can mature into a standing in galactic politics and society. Whether you are doing an initial study of the overwhelming evidence or an experienced scholar who contemplates the larger questions of human existence, this is the book that lays it out in detail. Highly recommended for either end of the spectrum.
